## Work Experience

01.08.19 – current

### Mirum Agency

Fullstack Developer

Been part of tech delivery of one of the Mirum Helsinki's office biggest client's entire website rebuild which I have been a part of since the architectural setup, on Drupal 8. Also, solo-building an entire AMP capability for the said client's website. Leading and training trainees and giving advice to others, continuous documentation creation, speccing features even further. Extension into other CMS platforms like Sitecore 9.1, .NET. Further dive into ReactJS, Redux, VueJS, RESTful API, Underscore.js/Lodash.

12.03.18 – 01.08.19

### Mirum Agency

Junior Web Developer

Maintenance and building of websites utilising Drupal 8 API, backend module creation, JavaScripts built on JS Frameworks, such as React, jQuery, also, SASS, HTML5, PHP with Acquia, AWS Search, BLT, Pipelines, git, CI/CD. Also setting up regression testing tools like Wraith and BackstopJS. Documentation creation and giving tech specs on features. Atlassian, Bitbucket, Confluence, Jira, Service Desk, Docker, Lando.

26.06.17 - 09.03.17

### GOInternational Finland, start-up

Web Developer, Digital Brand Builder

Creation of digital branding strategies for various services provided by the company, such as video creation and promotion & newsletter campaigns. Development & management of company's WordPress website, including the entire website development using HTML5, CSS5, JavaScript. Creation of Social Media Marketing designs, strategies, campaigns & posts, SEOs, Google AdWords. Service & UX design. Event Production on the digital & operational side.

07.01.17 - 31.03.17

### Ritsu

Project Lead & Market Researcher

Market Research into Scandinavian markets, and market penetration for log for an Estonian log-housing company & Project leadership of a small team to ensure the success of the project.
